

NY Employers Say to Albany: Don't Raise Our Health Care Costs

New York employers are working hard to provide New Yorkers with affordable health coverage amidst a pandemic, an economic downturn, and rising prescription drug prices.

But harmful bills that have passed the Legislature would strip businesses of tools they rely on to contain costs and ensure access to the medicines employees need.

WHAT WOULD BE THE EFFECT OF THESE BILLS? (S.3762/A.1396)

Make it **harder** for employers to provide prescription drug coverage for over **10 million New Yorkers**

Raise prescription drug spending by **\$2 billion** in New York in the first year alone

Drive prescription drug spending **\$28 billion higher** over the next 10 years

Albany:

Don't jeopardize access to medicines by limiting the tools NY employers rely on to keep prescription drugs affordable.
