

# Eliminating the Rebate Rule Protects Seniors and Saves Billions of Dollars

Approved in a last-minute push under the Trump Administration, the Rebate Rule would raise seniors' Part D premiums by up to 25%, increase federal spending, and threaten the success of Medicare Part D.

The Biden Administration has delayed the Rebate Rule and protected seniors temporarily.

**Now is the time to eliminate this Rule for good.**

## HOW ELIMINATING THE REBATE RULE WILL PROTECT SENIORS + SAVE MONEY:

Protects seniors from increasing Part D premiums, which are projected to rise by as much as 25% under this Rule

Maintains historically low Part D premiums, which have delivered \$1.9 billion in savings to seniors since 2017

Creates \$170 billion in savings Congress can put toward urgent priorities

Preserves the success of Medicare Part D, which millions of seniors rely on for high-quality health coverage

Seniors can't afford a 25% spike in their premiums.  
It's time to eliminate the Rebate Rule and protect seniors and taxpayers.
