

# Sacramento: Protect Patients, Don't Raise Rx Drug Costs

California lawmakers are considering a bill that could put patients at risk and raise drug costs.

**SB 524 will strip away tools that keep drug costs low.**

## WHAT WOULD BE THE EFFECT OF SB 524 IF SIGNED?

Limit patient safety measures that ensure pharmacies handle medications appropriately and put patients at risk

Push patients toward higher-cost pharmacy options, increasing health care costs for all

Put California patients on the hook for higher prescription drug spending

Make it harder to provide prescription drug coverage for over 18 million Californians

Sacramento: Protect patients and keep costs down.

Don't limit the tools that keep patients safe and prescription drugs affordable.
