

ARIZONA: DON'T RAISE HEALTH COSTS FOR SMALL BUSINESSES + FAMILIES

The Arizona Legislature is considering bills that will push more government bureaucracy on Arizona businesses and families.

New government mandates will mean billions of dollars in higher health care costs while trapping businesses in red tape.

65% of voters say big drug companies are "most responsible" for causing the high cost of prescription drugs. It's time for lawmakers to address Big Pharma's high and rising prices.

WHAT WOULD BE THE EFFECT OF THESE POLICIES?

Raise prescription drug costs for Arizonans by limiting their access to lower-cost pharmacy options

Raise health care drug spending by \$460 million in Arizona in the first year alone

Drive all prescription drug spending in Arizona nearly \$6 billion higher over the next 10 years

Push health costs nearly 15% higher by making drugs more expensive and imposing burdensome government mandates

Protect small businesses and families. Keep the cost of health care affordable.

Say no to higher health care costs for Arizona.
