

# DON'T RAISE Rx DRUG COSTS FOR MISSOURI BUSINESSES & FAMILIES

The Missouri Legislature is considering bills that will weaken pharmacy benefits for Missouri families and drive up costs for Missouri businesses by millions of dollars each year.

Missouri lawmakers must protect businesses and families from big drug companies' high and rising prescription drug prices.

## WHAT WOULD BE THE EFFECT OF THESE BILLS IF SIGNED?

Raise prescription drug costs by over \$1,000 per person per year by undermining affordable pharmacy benefits.

Raise prescription drug spending by millions of dollars in Missouri in the first year alone.

Jeopardize nearly \$20 billion in savings that pharmacy benefit managers (PBMs) will deliver to Missouri small businesses and patients over 10 years.

Restrict the flexibility and choice that 93% of employers say they want in offering prescription drug benefits to employees.

**Protect pharmacy benefits for businesses and families in Missouri.**
