

# DON'T RAISE Rx DRUG COSTS FOR CA EMPLOYERS AND UNIONS

California employers and unions work hard to provide affordable health care for 18 million Californians.

But new bills like SB 966 would restrict pharmacy benefits and could cost Californians over \$100 billion. These bills would put patients' health at risk and undermine the ability of California families to pay for prescription drugs.

## HOW LIMITING PHARMACY BENEFITS WILL HURT CALIFORNIA:

Raise prescription drug costs by **over \$1,000 per person per year.**

Jeopardize nearly \$110 billion in drug savings for Californians over 10 years.

Raise drug spending for unions and employers who provide benefits to **more than 18 million Californians.**

Weaken the pharmacy benefits of the **83% of union households** that are highly concerned about policies that will increase the amount they pay for health care and Rx drugs.

**Protect pharmacy benefits for working families in California. Vote no on SB 966.**
